

HLSA25G-255/4+0

- Lightning impulse current and surge arresters type T1+T2+T3.
  - The products consist of varistors with big discharge ability.
  - HLSA25 in configurations 1+1, 3+1 and HLSA25G are additionally combined with a gas discharge tube which ensures zero leakage current through the PE conductor.
  - Suitable for objects with considerable levels of protection LPL I and LPL II.
  - Installed at the boundaries of LPZ 0 – LPZ 1 and higher zones, closest to where overhead line enters the building i.e. in the main distribution boards.
- In case of the installation of a type T1+T2+T3 in the main switchboard, it is also necessary to install type T2 and T3 in any additional distribution boards in the electrical installation.
  - If the product contains two PE (or PEN) terminals, it must not be used as a PE (PEN) bridge.
  - **S** indication specifies a version with remote monitoring.
